HORSE DREAM®

VENUE

Gut Klein Nienhagen is a beautiful place close to the Baltic Sea. We are just 20 minutes away from the famous spa Heiligendamm.

Airports: Luebeck-Blankensee (LBC), Rostock-Laage (RLG) or Hamburg Fuhlsbuettel (HAM).

Train station: Kroepelin

HORSE DREAM®

HORSES

Our horses are especially schooled for working with clients.

In our opinion they are the real trainers. We human beings are just facilitators who accompany the learning process of our clients.

HORSE DREAM®

LICENSE PROGRAMME

This is a business approach. We provide seminars and team trainings for corporates only. We do not work with children, disabled, or traumatized clients. However, if you are qualified to do so, you may of course adapt our methods, if you wish.

We work with the Integral Model as a background theory. Thus, it would be helpful for you to be familiar with books such as "The Integral Vision" (Ken Wilber) or "Conscious Business" (Fred Kofman).

When you have attended these four workshops and joined the EAHAE you'll get the HorseDream Partner License. Only then you are allowed to use the phrase "Licensed HorseDream Partner" on your website, in your brochures, and on your business papers.

Workshop 1 "Distance and Nearness" is about working with clients in the so called picadero. This work is based on what Klaus Ferdinand Hempfling has written in his book "Dancing with Horses", which was published in Germany ("Mit Pferden tanzen") in 1993. This book is highly recommended especially for the first and for the second workshops.

Workshop 2 "Leadership Exercises" is about working with clients in various hands-on exercises. Leading a horse is a process. We will learn how to trust the horse's responses to our leadership approach.

Workshop 3 "Reaching Goals, Overcoming Obstacles" is about working with individual clients, groups, or teams. Reaching a goal is a process, overcoming obstacles is a process. We will learn how to trust the horse's responses to our goals and to our obstacles and how to trust the process. A goal is one thing, a personal vision is another, and a shared vision is a third. We will also work on our personal and our shared visions.

Workshop 4 "Integral HorseMapping" is about working with individual clients, groups, and teams in personal, structural, and organizational constellations. We will learn how to use the help of horses in a constellation process and we'll take the first steps toward the Integral Approach of Ken Wilber, Fred Kofman, Don Beck, Peter Senge and others.

Besides working with the horses you will learn more about our principles, our philosophy and our theoretical background. To be a Licensed HorseDream Partner you need to share the main aspects of our approach. But of course this approach is a learning system.

We are establishing an international "Licensed HorseDream Partner Community" in which we all are working together. There should be no space for competition, only for cooperation. As a licensed HorseDream Partner you have access to all information about concepts, training schedules, prices, customers, experiences or whatever is published on the HorseDream Partners website. In return every licensed HorseDream Partner should also publish his/her own material on this website to make it a real compendium for the whole group.

While we are working with the horses we will make videos. These may result in at least a 3-minute-DVD of each workshop for your own promotional presentations and for your website, YouTube or other video platforms.
